

Rebecca and David's Story

Diagnosed at age 34, now 46

David with the boys!

Our daughter, Lydia, home from Blue Lake Fine Arts Camp with David.

Get well cards from his Orchestra Students

We will not let PSC get us down! My husband was a full-time Orchestra Teacher here in Michigan until his PSC reared it's ugly head. Weeks of inpatient hospital stays, worried days and nights, sepsis, transplant listing, stents, you name it. What have we learned? We are BIGGER than PSC. We lean on PSC Partner's Seeking a Cure for support! We have friends and family that love us more than we ever knew. Our children are strong and thriving. We have amazing doctors, medical advocates and health care professionals. We will NOT give up. We will continue educating our friends, family and students about Primary Sclerosing Cholangitis. We will live our lives as normally as possible. Together....we can do this!
